About dinosaur fossil discovered in Zhucheng

500 meter long, 26 meter deep the Shandong's Zhucheng dinosaur stream had found dinosaur fossil gallery. There were dozens of well known dinosaurs expert that had confirmed that it is the largest fossil group with the richest reserves in the world. The UNESCO world geopark group Executive board said that "the unparalleled scale of this dinosaur fossil in Zhucheng was remarkable example of physical geographic".

AMAZING FACTS

|| Facts

- ❖ more than 7600 fossils have been found in the dig.
- ❖ was found in eastern province of Shandong.
- ❖ dinosaur fossil was found 500 meter long, 26 meter deep.

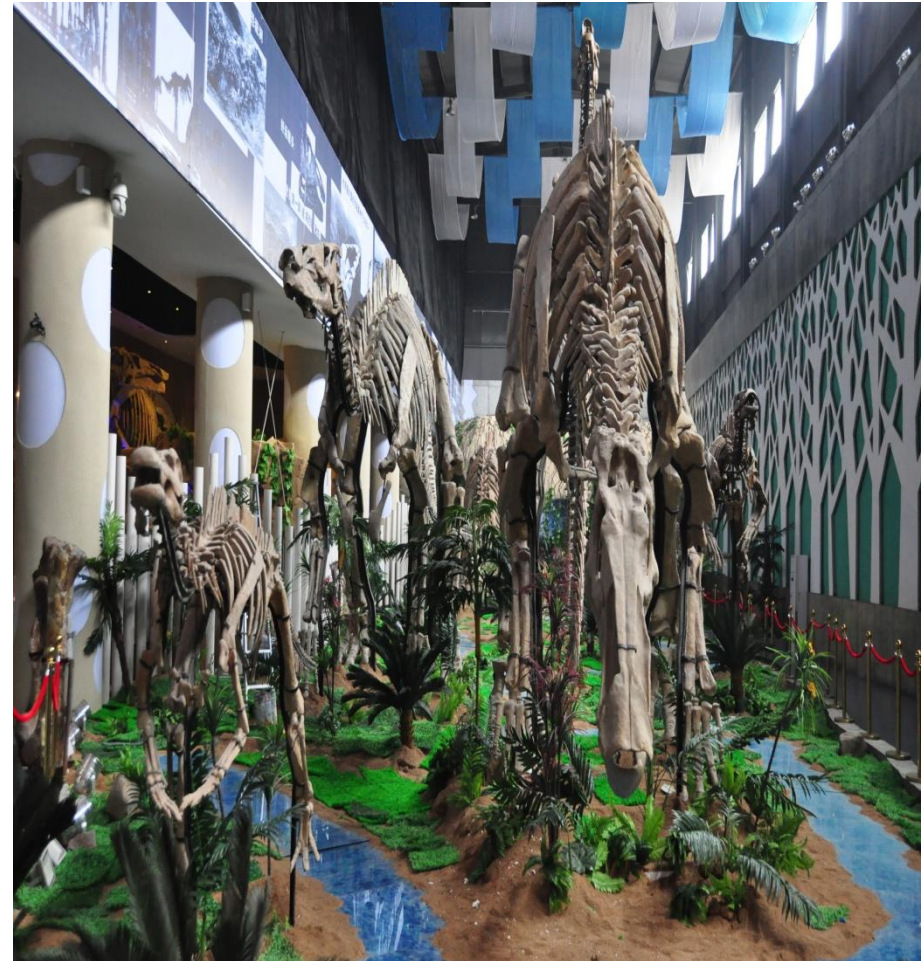

What did they do with the bones?

Well they were really creative that they take some fossil and build them up to be a dinosaur!!!!

They collect parts of the dinosaur's fossil/bones. There were so many dinosaur that somehow it scared me!!!!

But when I looked at the dinosaur, the Chinese people did not missed any single bone!! How could they do that? I mean how long did it even take them to do such a thing like this?

Picture This...

The baby dinosaur that just came out of the egg :3 so many

The bones was as tall as me!!

Later on the bone was taller than me !!!!!

ART

|| Creativity

If you ask me that if I could find all of the dinosaur's bone like the Chinese people did, my answer is no.

They have to be dinosaur experts to built a dinosaur with dinosaur's bone/fossil.

MY IDEAS

|| Ideas

First I thought that it was fake.

But then when I saw the information board, then I knew that the fossil was real.

I never knew that so many dinosaur died in china.

There were so many dinosaur's fossil that kind of creepy and freaks me out. So have a look.

Thanks for watching
